DELGADA

Microsoft *Flight Simulator*

Visit the Azores!

Ponta Delgada - João Paulo II Airport is an international airport located on the island of Sao Miguel, in the Portuguese archipelago of the Azores. It is the primary airport in the Azores, as well as the fifth-largest infrastructure managed by ANA Aeroportos de Portugal.

It has scheduled domestic flights to all islands of the Azores, plus Madeira, Lisbon, Porto, and Faro.

João Paulo II Airport also accommodates international flights to and from Europe and North America.

The airport is the major hub for the SATA Group of airlines and Ryanair.

Support

Product support is available by filling a support ticket:

<http://mkstudios.pl/support/index.php>

ILS problems

We've seen some ILS conflicts related to default ILS that is not excluded (MSFS bug). In such case navigate to:

FS2020\Official\OneStore\fs-base\scenery\0502 and find the file:

APX41180.bgl

rename to:

APX41180.bgx

or remove and keep BGL as a backup.

Airport data

- Tower frequency 118.30
- Ground frequency 119.40
- VMG VOR 111.20
- VSM VOR 112.00
- RUNWAY 12/30 2623 x 45 meters
- Coordinates N37°44.52' / W25°41.87'
- Elevation 259 MSL
- Magnetic variation 7 ° W
