User Manual: Perth Airport (YPPH) - Experimental Guided Tour
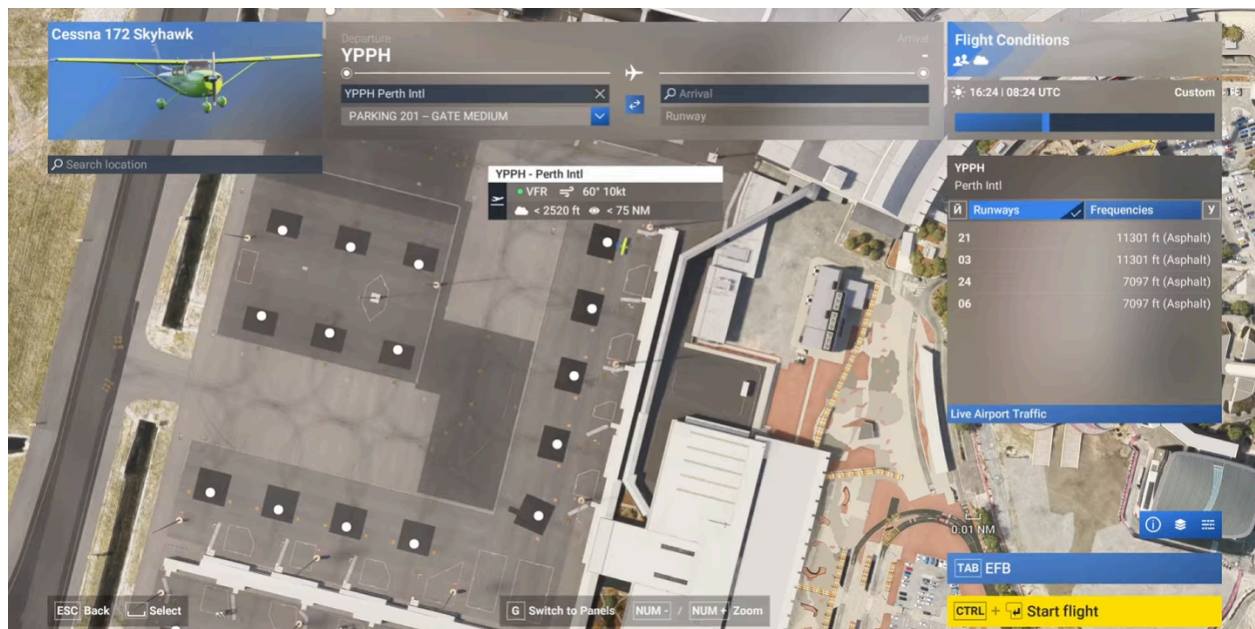

Version: 1.0.0
Date: 30/11/2025
Compatibility: Microsoft Flight Simulator 2024

The Perth Airport walking experience allows customers to journey from the train station to T2 as if they were a passenger. The experience includes: animated lifts and bus rides and involves exploring the airport, landside and airside, on foot.
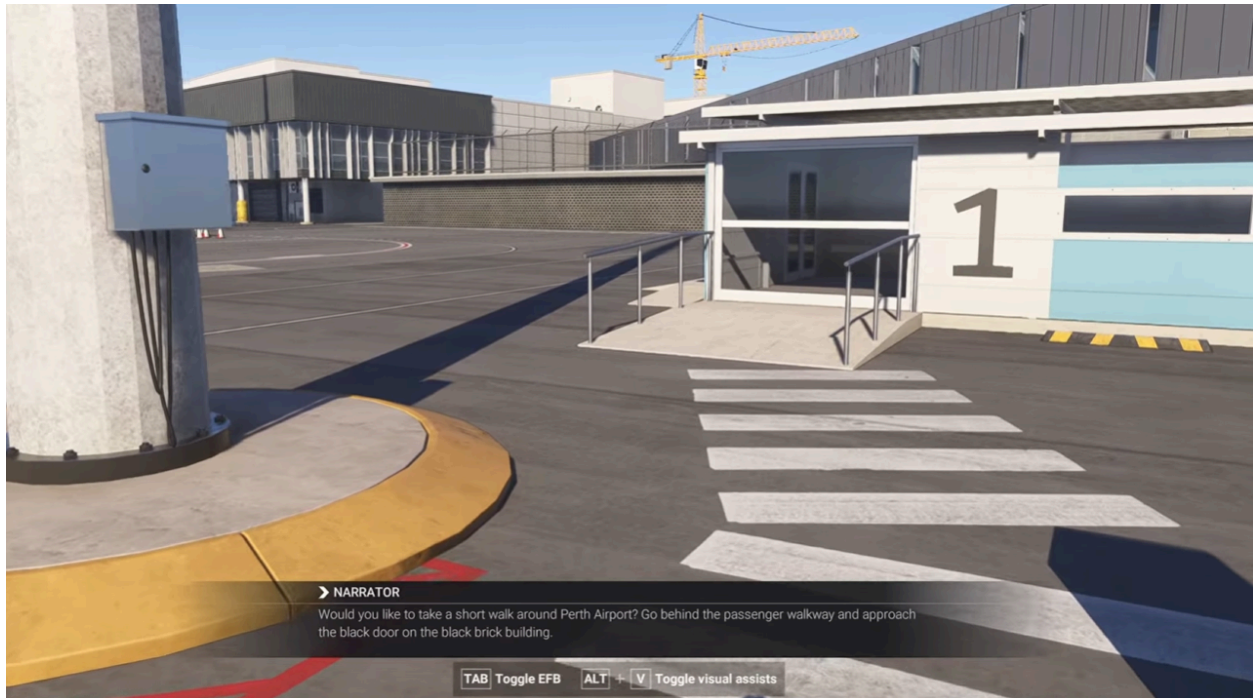

⚠️ Important: Experimental Feature

This Guided Walking Tour is currently an **experimental feature**. While we have tested the walking physics, lift triggers, and bus waypoints extensively, MSFS24 avatar collision physics can vary based on user settings and server performance.

1. To begin the guided tour, select parking lot 201 at Terminal 2 then click "START FLIGHT"

2. You should spawn in **Avatar Mode**, standing next to your aircraft. If you spawn inside your aircraft exit your aircraft and walk towards the Zebra crossing

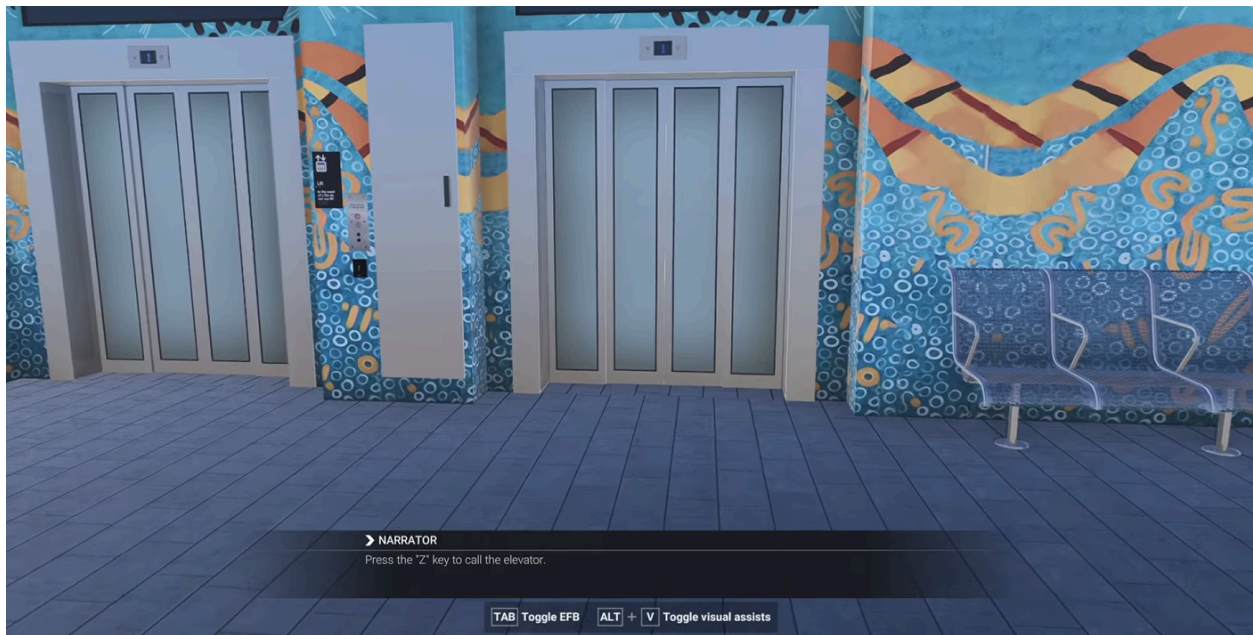

3. Follow the on screen instructions, walk around the passenger entrance to the black brick building, head for the door. When prompted press the "Z" key.

4. The teleport should take you to the rail station where you need to climb the elevator to the skybridge.

5. Walk to the Terminal 1 end of the Sky Bridge and approach the right hand side lift. The interaction should then trigger a dialogue box at the bottom of the screen. Press "Z" to call the elevator.

6. Enter the lift, wait for the doors to close. The lift will then start to descend. The doors will open once the lift reaches the ground floor. Exit the lift and turn right. Feel free to explore the exterior and interior before locating the red "SkyBus" at the front of T1.

7. Approach the bus. The interaction should then trigger a dialogue box at the bottom of the screen. Press "Z" to board the bus.

8. Once on board, the bus should start moving, traveling to T2. Enjoy the scenery!

9. Upon arrival at T2, disembark the bus and head for T2

10. Approach the open doors to T2 and navigate through the terminal towards the airside waiting areas.

11. Continue through, making your way to gates 6-13.

12. Exit through the open doors, head to your right and back to your aircraft.

Troubleshooting

Problem: The lift doors won't open.

- **Solution:** Step back 3 meters from the door and reapproach the door to trigger the interaction again.

5. Feedback

As this is an experimental feature, we value your bug reports. Please send screenshots of any collision issues or logic breaks to Orbx Official Discord or Support channels.

Thank you for flying with us and exploring Perth Airport in a whole new way!
