

TERMS OF USE

GRANT OF NON-EXCLUSIVE, LIMITED LICENSE

By installing the files included in the package on your PC, you hereby agree to the terms of use provided below.

The files contained in the package, referred to as “**Tivat**” hereafter, and related documentation are provided “as is” and do not include any type of warranty.

Provided you’ve installed this scenery, and otherwise complied with this EULA, the authors grant you the following personal, non-exclusive, non-transferable and limited rights:

1. You may not lease, rent or otherwise charge any person to use the **Tivat** included in the package.
2. You may not alter, reverse engineer or otherwise modify any portion of the **Tivat** included in the package unless you’ve received written permission to do so. Developers interested in obtaining permission may contact us at pyreegue.dev.co@gmail.com.
3. You may not distribute unauthorized copies of the files included in the package to any person by any means under any circumstances. You may, however, make copies for your personal use (backup, etc.).
4. You may not overwrite, replace, edit or otherwise modify any of the **Tivat** included in the package unless you’ve received written permission to do so.
NOTE: *This may lead to the package being broken.*
5. If you’re a developer participating in the creation of add-on products for any simulation platform, you may not use **Tivat** the documentation, files, data or information provided with this package without written permission. Developers interested in obtaining permission may contact us at pyreegue.dev.co@gmail.com.
6. You may not create and distribute work that interacts with any of the **Tivat** included in the package if that work is to be used in, or will facilitate the use of Tivat in commercial training, flight training, familiarization training, recurrent training, initial training or any other environment in which it’s to be used in violation of this EULA without receiving written permission to do so. Developers interested in obtaining permission may contact us at pyreegue.dev.co@gmail.com.

You may **NOT** use these files for real life flight training.

INSTALLATION

TO INSTALL THE SCENERY, FOLLOW THE STEPS BELOW

By installing the files included in the package on your PC, you hereby agree to the terms of use provided above.

1. To install the package manually, find the *pyreegue-lytv* folder inside of the zip archive you've just downloaded, then move it to your **Community** folder located inside of your root directory of Microsoft Flight Simulator. Enjoy!
2. If you're updating from the previous version, delete your old installation and then do **Step 1**. Do not overwrite old files, this might corrupt the package.

You may **NOT** use these files for real life flight training.
