

Dear Customer

Thanks for purchasing our Vessels: Anguilla, St Martin & St Barts scenery. We really hope you enjoy the added immersion that populated coastlines, marinas, ports and harbours bring to Microsoft Flight Simulator. With the Orbx software taking care of the install, all you need to do is fly!

NOTE: Our sceneries make use of AI and in-built animations. To enable AI driven animation, the traffic settings need to be at 10% or above (we recommend higher to make use of the default vessels and further increase immersion).

P.S. We recommend a dawn or dusk flight. The ships lights really sparkle below!

Kind Regards,

Coastal Scenery for Microsoft Flight Simulator
