Note that as we use real-world shipping data you may find that ships are a longer way from the coast than expected. We will also be adding more vessels to the quieter routes with future updates.

Set your leisure and shipping traffic to between 80-100% for best results (although Global Shipping will start to activate at 60%).

P.S. We recommend a dawn or dusk flight. The ships lights really sparkle below!

Kind Regards,

Coastal Scenery for Microsoft Flight Simulator
